BLOOD PRESSURE CATEGORY	SYSTOLIC mm Hg (upper number)		DIASTOLIC mm Hg (lower number)
NORMAL	LESS THAN 120	and	LESS THAN 80
ELEVATED	120 - 129	and	LESS THAN 80
HIGH BLOOD PRESSURE (HYPERTENSION) STAGE 1	130 - 139	or	80 - 89
HIGH BLOOD PRESSURE (HYPERTENSION) STAGE 2	140 OR HIGHER	or	90 OR HIGHER
HYPERTENSIVE CRISIS (consult your doctor immediately)	HIGHER THAN 180	and/or	HIGHER THAN 120

Acceptable Range of Respiratory Rates for Age	
Age	Rate (Breaths per Minute)
Newborn	30-40
Infant (6 months)	20-40
Toddler (2 years)	25-32
Child	20-30
Adolescent	16-19
Adult	12-20

CHAMHANA AIR STERILIZATION PURIFIER(Abbreviated "CASP")

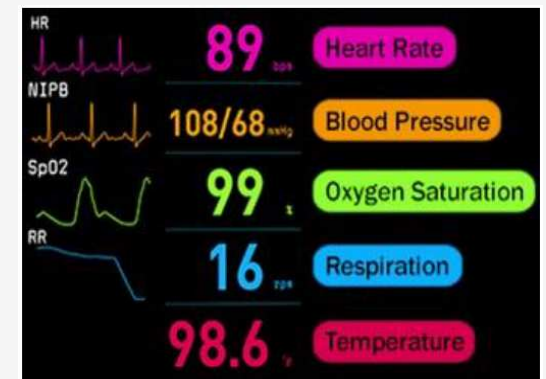

5 signals to check patient changes after using the device "CASP"

Of the 5 factors that monitor changes in positive patients after installing CASP in isolation ward ,Most importantly, oxygen saturation, pulse rate, and activity level of natural killer cells.

You can check the SPO2/pulse rate, on the right side of the monitor at all times and the blood test shows the NK CELL activity.

Attention to the DOCTOR who uses "CASP" .

1. The patient' s oxygen saturation is at least 6 days, up to 12 days.
I want you to make sure you' re recovering above 95%.
2. A covid19 patient gets an antiviral injection.
In case of immediate admission to a hospital room running "CASP"
98% (oxygen saturation) does not have CASP.
It may fall below 95%, but with CASP it is kept at 98%.
3. If the virus attacks the heart, it can cause an TACHYCARDIA.
If the pulse rate per minute is 100 or less, it is a healing process.
If it's going up to 100, it's going to get worse. As you know, I'm going to tell you this.
Please check based on the criteria.
4. The oxygen anions from CASP play the same role as phytoncide in the forest.
It will increase the activity of NK cells. It's about human immunity and natural healing.
It improves the resilience of the patient's ability to survive the virus on their own. to prove that there is.

ISEA Foundation's Activity

2019 May 15th – 17th Conference Room XVIII, Geneva UN, Switzerland

Our work will accomplish the 1st and 2nd sustainability development goals of U.N. Agenda 2030. Furthermore, by preventing the problems of urbanization in the Global Civil Society, where the population moves to the large cities, it will help the policy-making and operation methods of Smart City which is prepared in each country.

The terminology and elements for 'Survival Human Rights' have been agreed as one of resolutions during the resolution section in U.N. Geneva Conference. For strengthening the survival human rights' meanings, the Article 1, 2, 4, 25 and 30 on U.N. Universal Declaration of Human Rights have been used as reference.

2020 Aug 19th – World Humanitarian Day Seoul city Republic of Korea

-Survival Human Rights and COVID-19 group treatment cases and work promotion plans-

ISEA Foundation with consultative status to the United Nations Economic and Social Council, circulated and announced a statement to mark the World Humanitarian Day (annually on August 19th).

As a joint statement, the Statement has already been submitted to more than 10 international organizations and GBFC with the UN's approval.

At the event held by the organization to mark World Humanitarian day, Survival Human Rights and COVID-19 case treatment with Chamhana Air Sterilization Air Purifier and Survival Rights was introduced. And the statement included the following: "Survival Human Rights prevent the vicious cycle of the increase of poverty and livelihood crimes by providing the elements of basic income policy for those who suffer from loss of job, physical illness or discrimination of any kind," "MobiDollar can be used as a financial technique to realize each country's basic income policy. Particularly, it can provide some or all of basic income to governments that do not have such technology and finance," and "ISEA Foundation provided a solution to the concerns of manufacturers and buyers by supporting MobiDollar to buyers and allowing them to make joint payments for the amount of quarantine products in cash and MobiDollar."

... In addition, the statement refers to the report of IMF, "the fiscal policy is at the forefront of the response to the COVID-19 epidemic," "it was a priority to fully accept spending on health and emergency services,"

ISEA Foundation's Activity

RIGHT TO EMERGENCY MEDICAL SERVICE

The right of patient to be transported to hospital to prevent a situation when a person in pain is left alone.

RIGHT TO FOOD

The right to be provided of minimum amount of food which an individual must eat daily.

RIGHT TO COMMUNICATION

The right to be provided of safe place to sleep.

RIGHT TO INFORMATION

Individuals' and organizations' right to be provided of essential information regarding certain government, organization, product, or culture and participate for necessity.

RIGHT TO MOVEMENT

The right to be provided with the freedom of movement and residence and to use means of transportation.

RIGHT TO EDUCATION

The right to be guaranteed of minimum educational opportunities for self-development and growth.

“Survival Human Rights” is different from just ‘Human Rights’ and also different from ‘Survival Rights’. “Survival Human Right” is the very basic rights that should be guaranteed for human beings to survive. Its ideology is clearly derived from the articles mentioned about human’s survival rights on U.N. Universal Declaration of Human Rights.

The COVID-19 pandemic is more than a health crisis; it is an economic crisis, a humanitarian crisis, a security crisis, and a human rights crisis. This crisis has highlighted severe fragilities and inequalities within and among nations. Coming out of this crisis will require a whole-of-society, whole-of-government and whole-of-the-world approach driven by compassion and solidarity.
